PROTECTING YOUR

HOME WITH

CLASS

SHINGLES

WWW.MALARKEYROOFING.COM

IF YOU ARE CONTEMPLATING PROTECTING YOUR HOME WITH A CLASS 4 SHINGLE, YOU MAY BE WONDERING, "WHAT IS A CLASS 4 SHINGLE?"

▶ WHAT IS THE UL 2218 IMPACT RESISTANCE TEST?

UL 2218 is the industry standard for testing shingles against the impact of hail. There are four different testing classes that are denoted by four different steel ball sizes, ranging from 1¼" to 2". The steel balls are dropped at a range of 12-20 feet to impact the shingles at high speed, replicating the force of actual documented hail. The back of the shingle is then inspected for any cracking or visible signs of distress from the impact of the steel ball. The UL 2218 Class 4 impact resistance is currently the highest rating in impact resistance.

▶ WHAT MAKES MALARKEY SHINGLES IMPACT RESISTANT?

The quality of asphalt we employ. The addition of SBS polymers, and our advanced blending system create our superior SBS product. Malarkey Roofing Products® has been utilizing rubber polymer technology to modify our asphalt roofing for over 25 years.

Malarkey's Legacy, Alaskan, and Ecoasis Premium all pass UL 2218 Class 4

IMPACT RESISTANCE TESTING					
Drop Height (ft)	12	14	17	20	
					
	Golfball (1.680" D)	(1½" D)	(1¾" D)	(2" D)	Baseball (3" D)
Class	1	2	3	4	

DISCLAIMER

**WHY DON'T MANUFACTURERS OFFER HAIL RESISTANCE WARRANTIES?
NOTHING IS HAIL PROOF**

A hail storm can destroy even the best roofs. Given all of the testing, there is no accounting for the size, shape, velocity or direction of hailstones impacting your roof.

NOTHING IS HAIL PROOF*

*Actual picture of hail damage that punctured roof through wood deck

MALARKEY'S HISTORY WITH RUBBERIZED POLYMERS

For over 25 years, Malarkey has been manufacturing aesthetically pleasing rubberized products to meet challenging environments. Malarkey's modified story begins in 1986 with the SBS modified three-tab shingle, The Alaskan®. Engineered for high wind, cold weather installation, and impact resistance, The Alaskan® was a performance shingle. Due to the success and adoption of The Alaskan®; Malarkey's rubberized story continued in 1997 with the Legacy®, a revolutionary SBS modified laminate shingle.

With over two decades of experience with modifying polymers, Malarkey Roofing Products® continues to raise the benchmark for quality shingles.

WHAT MAKES MALARKEY SHINGLES IMPACT RESISTANT?

Our polymer blending facility uses advanced technology to produce very controlled mixing, making our products some of the most advanced in the industry.

WHY DOES MODIFIED SBS ASPHALT MAKE A DIFFERENCE?

Malarkey's extensive history with modified asphalt began in 1977. Malarkey Roofing Products® has been utilizing rubber polymer technology to modify our asphalt roofing for over 25 years. As opposed to conventional oxidized asphalt the advanced characteristics of SBS technology works cohesively to add strength and flexibility, as well as fortify the surface of our products. Our modified asphalt is exclusively blended by our technology for use in our manufacturing production line for our **Legacy®**, **Ecoasis Premium™** and **Alaskan®** shingles.

NOT ALL ROOFING MATERIAL PERFORMS THE SAME AGAINST IMPACT DAMAGE

Impact Resistant Roofing products are the solution to frequent roof replacements. Certain roofing materials pass UL 2218 at higher levels, qualifying them for discounts.

- *Malarkey's Legacy®, Ecoasis Premium™, and Alaskan® all pass UL 2218 with a Class 4, the highest rating possible.*
- *Some standard asphalt products do pass Class 4, but they are not as flexible or durable against impact.*

- *All of Malarkey's Class 4 products are manufactured with SBS modified asphalt, meaning they have increased flexibility and durability.*

**SAME STORM.
SAME NEIGHBORHOOD.
DIFFERENT RESULTS.**

“Malarkey Roofing Products® is dedicated to creating quality products that offer protection and longevity to your roof.”

LEGACY® & LEGACY®

CLASS 4 REVOLUTIONARY LAMINATE SHINGLES

EXTREME WEATHER PROTECTION

The Legacy® provides a durable barrier against extreme weather, receiving the UL 2218 Class 4 Impact Resistance classification, the highest rating possible.

In a Class 4 rating test, the Legacy® withstood a simulation of hailstones impacting a roof at 90 mph (144 kph) without sustaining damage.

SBS MODIFIED ASPHALT

The rubberizing aspect of SBS increases flexibility and weatherability for your roof. The thermo cycling resilience of SBS modified asphalt provides greater granule adhesion for the shingle to create a better barrier from the elements. When granules stay on the shingles, your roof lasts longer.

RAIN SEAL PROTECTION

Malarkey's Legacy® shingle is manufactured with a double line of defense in the critical area for a laminated shingle, with double SEBS asphalt rain seal protection.

Malarkey SEBS asphalt adhesive is superior to oxidized asphalt because of its cohesive and adhesive properties. The SEBS asphalt has elongation capabilities of up to 800 percent, making it flexible down to zero degrees.

LIMITED WIND WARRANTY

Legacy® shingles come with a 110 mph/177 kph Limited Wind Warranty.

ENHANCED WIND WARRANTY

Legacy® shingles are eligible for a 130 mph/209 kph Enhanced Wind Warranty Protection when Malarkey's Smart Start™ shingle is installed, shingles are six nailed, and Malarkey's supporting products-Arctic Seal 401, Right Start UDL, or Malarkey Hip and Ridge Shingle (EZ-Ridge™ 222-224*) or Hip & Ridge Strips (225*-227)** are used.

THE ZONE®

The Legacy® is manufactured using the patented ZONE® technology which includes a tapered nailing area over three times larger than other laminate shingles. The ZONE's® larger nailing area dramatically improves correct fastener placement. Improper fastener placement is the leading cause of incorrect shingle installation and can subsequently void the warranty.

SCOTCHGARD PROTECTION

The Legacy® shingles featuring the 20 year Scotchgard™ Algae Resistant Roofing System warranty from 3M are equipped with the most effective solution available against algae staining.

RUGGED DURABILITY

Malarkey's revolutionary Legacy® shingle technology begins with a durable base layer of fiberglass mat. Malarkey's unique fiberglass mat is coated on both sides with the SBS modified rubber asphalt, which provides tensile strength and increased flexibility, protecting your investment.

TESTING & APPROVALS

- ASTM D7158 Class H
- ASTM D3161 Class F
- ASTM E108 Class A

CLASS 4 SOLAR REFLECTIVE LAMINATE SHINGLES

EXTREME WEATHER PROTECTION

Ecoasis Premium™ provides a durable barrier against extreme weather. Ecoasis Premium™ received the UL 2218 Class 4 Impact Resistance classification, the highest rating possible.

SBS MODIFIED ASPHALT

The rubberizing aspect of SBS increases flexibility and weatherability for your roof. The thermo cycling resilience of SBS modified asphalt provides greater granule adhesion for the shingle to create a better barrier from the elements. When granules stay on the shingles, your roof lasts longer.

RAIN SEAL PROTECTION

Malarkey's Ecoasis Premium™ shingle is manufactured with a double line of defense in the critical area for a laminated shingle, with double SEBS asphalt rain seal protection.

The SEBS asphalt has elongation capabilities of up to 800 percent, making it flexible down to zero degrees. The rain seal remains intact through the freeze and thaw cycle. Malarkey SEBS asphalt adhesive is superior to oxidized asphalt because of its cohesive and adhesive properties. The adhesive properties of SEBS asphalt join the shingle together while the cohesive properties prevent it from breaking apart from itself.

LIMITED WIND WARRANTY

Ecoasis Premium™ shingles come with a 110 mph/177 kph Limited Wind Warranty.

ENHANCED WIND WARRANTY

Ecoasis Premium™ shingles are eligible for a 130 mph/209 kph Enhanced Wind Warranty Protection when Malarkey's Smart Start™ shingle is installed, shingles are six nailed, and Malarkey's supporting products-Arctic Seal 401, Right Start™ UDL, or Malarkey Hip and Ridge Shingle (EZ-Ridge™ 224*) or Hip & Ridge Strips (225*-227*)** are used.

ZONE®

One of the most critical aspects of a successful roofing project is correct shingle installation. Improper fastener placement is the leading cause of incorrect shingle installation and can subsequently void the warranty. Ecoasis Premium™ is manufactured using the patented ZONE® technology which includes a tapered nailing area over three times larger than other laminate shingles. The ZONE's® larger nailing area dramatically improves correct fastener placement.

SCOTCHGARD™ PROTECTION FROM 3M

Regions that are prone to algae growth should inquire about our Ecoasis Premium™ shingles featuring the Scotchgard™ protection from 3M. The Ecoasis Premium™ shingles featuring the 20 year Scotchgard™ Algae Resistant Roofing System warranty from 3M are equipped with the most effective solution available against algae damage.

SOLAR REFLECTIVE SHINGLES

Ecoasis Premium™ shingles are engineered with solar reflective granules, which create a "cooling" effect for your home. Ecoasis Premium™ meets the required reflectance to be designated with some of the industries leading energy conservation standards, ENERGY STAR, the California Energy Code Part 6, Title 24 compliant and listed with CRRC Mesquite and Agave solar reflective colors meet LEED requirements.

Ecoasis Premium™ promotes energy savings and global warming alleviation while complying with green building programs.

RUGGED DURABILITY

Malarkey's revolutionary Ecoasis Premium™ shingle technology begins with a durable base layer of fiberglass mat. Malarkey's unique fiberglass mat is coated on both sides with the SBS modified rubber asphalt which provides tensile strength and increased flexibility, protecting your investment.
